
SAMPLE SOLUTIONS

FIRST RESPONDERS AND EMERGENCY SERVICES

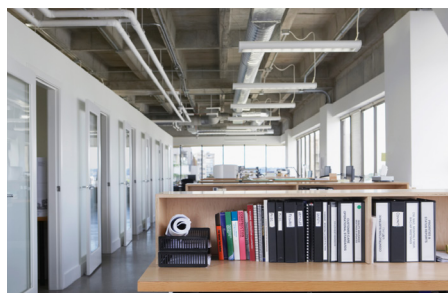

Your fire station may be eligible for a free or heavily-discounted LED lighting upgrade by maximizing state and utility rebates.
Contact us to learn more and to schedule your free lighting assessment.

APPARATUS AREA

High-Output LED Lighting Solutions for Large Spaces

Ensure your squad is ready for quick deployment. Our detailed photometric reports consider layout (i.e. engine locations), mounting height, color temperature, light intensity, and light distribution to combine fixtures and controls that are durable, flexible, long-lasting, and budget-friendly.

STATION INTERIOR

Affordable Upgrades to Lower Bills and Improve Performance

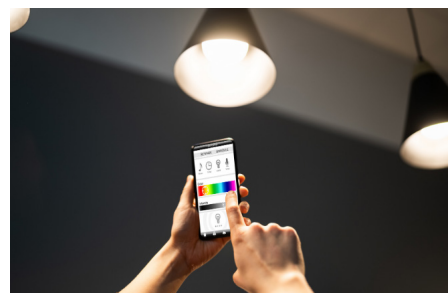

Did you know lighting directly impacts mood, wellness, and performance? We provide rebate-supported retrofits and fixtures, and science-backed designs to implement LED lighting systems that are budget-friendly, reduce utility costs, and improve the overall quality-of-life of occupants.

EXTERIOR LIGHTING

Improve Safety and Visibility While Highlighting Headquarters

Ensure clear visibility and safety at night for guests and staff via exterior lighting additions and upgrades. Improve your station's aesthetic, ensure proper light layouts, and seamlessly incorporate into existing circuits with built-in photocells or integration with timers.

LIGHTING CONTROLS

Intuitive and Intelligent Lighting Control Systems

As an engineering firm, we specialize in providing and customizing professional-grade LED lighting controls to fulfill the needs of your facility. Functionality includes energy savings, hands-free operation, multi-step dimming, color tuning, circadian lighting, IOT integrations, and more.

FIRE DEPARTMENTS COMPLETED WORKS

WEST MILFORD COMMUNITY FIRE DEPARTMENT #2

"We decided to upgrade our lighting from the incandescent and fluorescent lighting to LED lighting. Not only for the energy savings but also to give our firehouse a cleaner look. We rent our hall space for wedding parties, birthday parties, and things like that, so we wanted to give our firehouse a cleaner look...We are self-installing these ourselves. They are simple to do, very easy. If anybody has ever done a light fixture in your own home, it's that simple...Working with [Pure Lighting] has been absolutely wonderful. They know everything you can imagine about lighting and did everything for us. They came in, analyzed the whole firehouse, knew what was needed and in what room. They handled all the paperwork for the rebates. It's been wonderful from step one to the end."

- Frank LoPorto,
Chief, 26 Year Volunteer Fireman

WEST MILFORD COMMUNITY FIRE DEPARTMENT #6

"Changing the lights and changing the position of lights made a big difference. It's like night and day in here...Safety wise, it's important for the guys coming in here. Because before that, you really couldn't see. It was hard to navigate in the dead of night when you came here half asleep. You were just kind of grabbing based on remembrance so the new lights and especially the night lights made a big difference."

- Ed Alrich,
Chief, Building Chairman

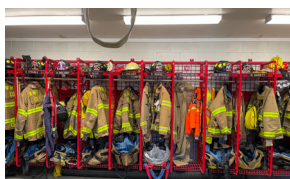

FIRE DEPARTMENTS COMPLETED WORKS

APSHAWA VOLUNTEER FIRE COMPANY #1

"[The Pure Lighting Team] was really good. They handled everything excellently. Whenever we had a problem, they handled it...[Our crew and guests] love the new lighting. We rent the space and we've gotten comments about how much nicer it looks, and how the lighting is really nice. The experience and comments have been really positive."

- Dave Struble
Ex-Chief, 45 Year Volunteer Fireman
