

PROJECT COMPLETED

MA'AYANOT YESHIVA SCHOOL THEATRE UPGRADE

PROJECT OVERVIEW

The Puretek design team with help from our partners at Northeast Stage comprehensively designed a complete stage system including lighting, power distribution, controls, rigging, and drapes. Professional training was provided on site to empower staff and students at Ma'ayanot Yeshiva HS to maximize use of their new multipurpose room theater.

FEATURES:

Features included in the lighting system would consist of properly focused LED Spotlights, RGBW LED par lights with autozoom divided into three over-stage rows to provide flexible stage lighting options, and a 10" touchscreen controller pre-programmed by Puretek with client requested presets for quick system access that is simplified.

TURN-KEY SOLUTIONS

We are proud to partner with a highly curated group industry experts to offer our clients high-end full-scale turnkey solutions. Our network includes skilled installers, ETCP certified riggers, audio-visual integrators, theater educators, and more. We stay involved throughout the entire process to ensure a smooth, seamless, and easy process from design through installation through ribbon cutting.

STAGE RIGGING

Typical rigging options include dead-hung, manually operated (pulley system to lower and raise rigging for simpler access to suspended equipment), or motorized (dynamic rigging that can add a wide array of dazzling effects to live performances). Between its precarious overhead positioning and heavy loads supported, improperly supported rigging is a major hazard. ETCP (Entertainment Technician Certification Program) are rigorously trained in the physics, techniques, and regulations to ensure safe, high-performing, and long-lasting rigging.

LOCATION

Teaneck, NJ

DATE

Summer '22

CATEGORY

Stage/Theatre

PARTNERS

Northeast Stage

TRUSTED PARTNERS

To ensure a smooth implementation process, Puretek Group served as a project manager and brought in help from trusted partners, Northeast Stage to support rigging and drapery specification and installation. At the conclusion of the install, comprehensive training was provided to staff to empower and inspire Ma'ayanot Yeshiva High School staff and students to run astonishing productions.
